

Bachelor of Arts Honours in IsiNdebele

(Qualification Reference: SI)

Deferral Comments	In its response the institution has confirmed that the programme only has one compulsory module. This raises a concern as to how different combinations of elective modules taken by students will lead to a coherent programme, Bachelor of Arts in IsiNdebele - the rules of combination remain unclear. Furthermore, the research methodology module is an elective. Such a module normally provides foundational knowledge that students need for the research project.
